Continued below | [Regarding the EIS on the licensing of Yucca Mt. as a High Level Radioactive Waste (HLRW) repository, I am opposed on the grounds that the site is geologically unstable as the nation's HLRW dump. All evidence points to an active magma pocket below the site and numerous faults in the area.] In addition, [licensing Yucca Mt. would be a violation of the treaty rights of the Western Shoshone people who also opposed to a HLRW repository at Yucca.] Also, [the people of Nevada through their State's political representatives have continued to say no to plans for licensing Yucca Mt. as a HLRW repository.] *2* *Continued*
